Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, 22-64, 67-93, and 96-101, drawn to an optical fiber, classified in class 385, subclass 128.
- II. Claims 20-21, 65-66 and 94-95 are, drawn to a method of making an optical fiber, classified in class 65, subclass 385.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the product of an optical fiber can be manufacturing by a different process such as the process recited by U.S. Patent No. 5,106,402 to Geittner. Invention of Group II is classified in a different class and subclass, therefore provides extra burden upon the Examiner and thus restriction is proper. The criteria for establishment of restriction is if it can be shown that the product can be made by an entirely different method as claimed by applicant. Because the method of making and the product of the optical fiber are distinct invention as acquired a separate status in the art as shown by their different classification, restriction for examiner purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If the Applicant should elect Group I, Group I is further subject to species restriction, wherein Group I contains claims directed to the following patentably distinct species of the claimed invention:

Species I	Claims 1-10, 22, 45-48, 82 and 83;
Species II	Claims 11-19, 23, 49-52, 72, 84 and 85;
Species III	Claims 24-27, 53-55, 86 and 87;
Species IV	Claims 28-34, 56-58, 88 and 89;
Species V	Claims 35-38, 59-61, 73, 90 and 91;
Species VI	Claims 39-44, 62-64, 74, 92 and 93;
Species VII	Claims 67-69, 96 and 97;
Species VIII	Claims 70, 71, 98 and 99;
Species IX	Claims 75-77, 100 and 101;
Species X	Claims 78-81.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is

Art Unit: 2879

allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventor is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
